Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-27, drawn to an electro-mechanical battery, classified in class 310, subclass 74.

II. Claims 28-38, drawn to a composite flywheel, classified in class 74, subclass 572.

III. Claim 39-47, drawn to passive magnetic bearings, classified in class 310, subclass 90.5. The inventions are distinct, each from the other because of the following reasons:

Inventions Groups I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as a battery with the flywheel of Group II or the magnetic bearings of Group III; the flywheel can be used in other devices besides the battery of Group I or with conventional bearings rather than the magnetic bearings of Group III. See MPEP § 806.05(d).

2.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
